Professional Summary

Cybersecurity-focused engineering graduate with hands-on experience in Linux, networking, Python scripting, Docker, and DevSecOps automation. Skilled in log analysis, vulnerability scanning, security monitoring concepts, and incident investigation workflows. Interested in applying SIEM, threat intelligence, and incident response practices to strengthen security operations and support proactive threat detection.

Technical Skills

Security Operations	SIEM Concepts, Log Analysis, Incident Response, Threat Intelligence
Networking	TCP/IP, DNS, HTTP/HTTPS, OSI Model, Network Troubleshooting
Operating Systems	Linux, Bash Scripting, Windows, System Administration
Security Tools & Automation	Trivy, SonarQube, Python, Git, Docker, Jenkins

Projects

Enterprise SOC Home Lab | Wazuh, Linux, Python, SIEM, Log Analysis

- Built a Wazuh-based SOC home lab to monitor security events, analyze authentication logs, and investigate suspicious activity using custom detection rules.
- Developed Python automation to analyze security alerts, identify suspicious patterns, and generate structured incident reports.
- Created detection rules and incident response documentation for SSH brute-force attempts and suspicious login activity.

Network Threat Detection | Python, Wireshark, Zeek, Suricata, Linux

- Developed a Python-based network threat detection tool to analyze Zeek connection logs and Suricata EVE JSON alerts.
- Implemented configurable detection logic to identify potential port scans, repeated connections, and suspicious network activity.
- Automated alert correlation, evidence summaries, and investigation reports to support network security analysis.

Automated Incident Response | Python, Linux, Wazuh API, REST API, JSON

- Developed a Python-based incident response automation framework to ingest, normalize, enrich, and prioritize security alerts using configurable policies.
- Implemented explainable response decisions, approval workflows, and simulated response actions with audit logging.
- Automated incident report generation in JSON and Markdown formats to support incident tracking and investigation.

Education

Modern Education Society's Wadia College of Engineering	2022 – 2026
B.E. in Electronics & Telecommunication Engineering	CGPA: 8.35/10
Pune, Maharashtra	
Shramik Junior College, Sangamner	2022
Higher Secondary Certificate (MSBSHSE)	70.50%
Sangamner, Maharashtra	

Certifications

- Cisco Networking Academy — Introduction to Cybersecurity
- IBM SkillsBuild — Cybersecurity
- Oracle Agentic AI Foundations Associate (2026)
- Linux for Absolute Beginners
