

Kartik Kale

DevOps Engineer | AWS | Kubernetes | Docker | Terraform

+91-9359156015 | kalekartik2004@gmail.com | Pune, Maharashtra | [LinkedIn](#) | [GitHub](#)

Professional Summary

Aspiring DevOps Engineer with hands-on experience building **AWS infrastructure**, automating **CI/CD pipelines**, and deploying containerized applications using **Docker and Kubernetes**. Skilled in **AWS, Jenkins, GitHub Actions, Terraform, CloudFormation, Argo CD, Prometheus, and Grafana**, with a strong foundation in **Linux, Bash, Python, Git, networking, and cloud automation**. Seeking an entry-level DevOps or Cloud Engineer role to apply practical infrastructure and deployment skills.

Education

Modern Education Society's Wadia College of Engineering | **CGPA: 8.35** **2022 – 2026**
B.E. – Electronics & Telecommunication Engineering *Pune, Maharashtra*

Skills

Cloud:	AWS (EC2, VPC, IAM, S3, RDS, Lambda, CloudWatch)
DevOps & CI/CD:	Jenkins, GitHub Actions, AWS CodePipeline, AWS CodeCommit
Containers & Orchestration:	Docker, Kubernetes, Docker Compose, Minikube, kubectl
Infrastructure as Code:	Terraform, CloudFormation
GitOps:	Argo CD
Monitoring & Observability:	Prometheus, Grafana, Alertmanager, AWS CloudWatch
Programming & Systems:	Python, Bash, Linux, Git, AWS CLI
Networking:	TCP/IP, DNS, Subnetting, Routing, VLANs, Security Groups, NACLs, Load Balancing

Technical Projects

Multi-Cluster Kubernetes GitOps [[GitHub](#)] | *AWS EKS, Kubernetes, Argo CD, GitHub, eksctl, kubectl, IAM, VPC*

- Implemented a GitOps-based **Amazon EKS** deployment architecture with **Argo CD** centrally managing Kubernetes workloads across two spoke clusters.
- Configured **GitHub** as the declarative source of truth for automated manifest synchronization, application health monitoring, drift detection, and self-healing deployments.
- Validated cluster and workload health using **kubectl** and **Argo CD CLI**, while troubleshooting Kubernetes deployments, IAM/RBAC configurations, and cluster connectivity.

Three-Tier AWS Architecture [[GitHub](#)] | *AWS, EC2, ALB, NLB, RDS, S3, CloudFront, Route 53, Auto Scaling, IAM*

- Designed and deployed a **three-tier AWS architecture** with frontend assets hosted on **S3 + CloudFront**, application servers running on **EC2 behind an ALB**, and **RDS** isolated in private subnets.
- Configured **Auto Scaling Groups**, load balancing, and multi-AZ deployment to improve application availability, scalability, and traffic distribution.
- Automated infrastructure provisioning using **AWS CloudFormation** and implemented security controls with **IAM roles, security groups, and NACLs**.

DevSecOps CI/CD Pipeline [[GitHub](#)] | *Jenkins, Docker, DockerHub, SonarQube, Trivy, GitHub Webhooks, AWS EC2*

- Built an automated **CI/CD pipeline** using **Jenkins, GitHub Webhooks, and Docker** to build, package, and deploy a Node.js application on **AWS EC2**.
- Integrated **SonarQube** for static code analysis and **Trivy** for container vulnerability scanning as security gates before deployment.
- Published versioned Docker images to **DockerHub** and automated pipeline triggers through GitHub Webhooks, improving deployment consistency and release traceability.

Certifications

AWS Certified Cloud Practitioner Essentials | Oracle Agentic AI Foundations Associate (2026)
